-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. The preliminary amendment filed September 28, 2006 has been received.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 20 of page 6, line 23. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: on page 6, in line 28 "28" should be -26-.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3617

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Dashew.

Dashew discloses a method for moulding a concrete cofferdam (12) adapted to be a hull of a

floating structure, characterized by moulding the concrete cofferdam onto an at least partially

profiled mould (as shown in figure 2) such that the concrete cofferdam obtains an exterior delimiting surface having a structure.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dashew.

Dashew does disclose moulding the concrete cofferdam (12) onto a corrugated sheet having trapezoidal depressions and

Art Unit: 3617

ridges, but does not disclose that the sheet is metal. However, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains to make the sheet metal. While Dashew discloses the use of fiberglass or plastic, a thin metal would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains to use because it would be stronger and most likely last longer. Making the liner of sheet metal could present some assembly problems, but having the liner last longer would outweigh these problems.

Dashew does not disclose that the metal sheet is sinusoidal. However, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains to make the metal sheet sinusoidal. Dashew discloses a corrugated pattern. A sinusoidal pattern is similar to a corrugated pattern. Using a sinusoidal pattern would provide curved surfaces less likely to injure.

Allowable Subject Matter

8. Claims 1-10 are allowed.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kastengren is cited to show the mold for constructing a concrete ship. Guerini also is cited to show construction of a concrete ship. Anders is cited to show the heating of a hull with heat exchanger coils 50. Gronroos is cited to show the life support system with a heat exchanger. Watchorn is cited to show figure 1. Clasky is cited to show the spherical residential structure which floats in a body of water. Dodge is cited to show the marine air conditioner.
